"There are no lessons that waste the gameplay time of our lives
Whether it's a failure or a success, you will always learn something that helps you level up"

Resume Profile

I'm an Italian IT professional focused on Artificial Intelligence, pairing hands-on infrastructure and security experience with a solid academic background in machine learning and data analysis. Throughout my degree I deliberately worked in parallel to ground academic theory in real-world practice: working as an IT consultant for several companies, I handled hardware and software infrastructure, cybersecurity, and digital brand management, where I invested heavily in the soft skills I consider as decisive as technical ability. At the University of Turin I built strong foundations in mathematical modelling, data analysis, and information security, culminating in a Bachelor's thesis in which I designed a custom supervised-learning model to detect and analyse business anomalies. I'm now focused on turning that foundation into practical AI systems.

Education

IT University of Copenhagen — *Copenhagen, Denmark*

MSc in Computer Science — *2026 - ongoing*

- Track: Machine Learning and Artificial Intelligence.

University of Turin — *Turin, Italy*

B.Sc. in Computer Science — *09/2020 - 11/2025*

- Thesis: trained a custom supervised-learning model to identify, analyse and understand anomalies in business processes, mitigating them and optimising existing processes to increase efficiency.
- Paket Project: food-parcel management system built with the Italian Red Cross (Asti branch) to cut waste, standardise distributed portions, and streamline the work of distribution operators and administrators handling the paperwork.

I.T.I.S. A. Artom — *Asti, Italy*

Computer Science Diploma — *09/2015 - 06/2020*

- Final research project on wearable and portable devices for quality-of-life improvement based on Personal Area Networks, with a focus on healthcare applications (ECG, health monitoring).

Knowledge

AI & Data	Python, R, SQL, Scikit-Learn, NumPy, Pm4py
Dev	C++, Java, C, React, TS, JS, Lua
DevOps	AWS, Terraform, Docker, Kubernetes, CI/CD, Git, GitHub, Bash
Networking	ISO/OSI Stack, Protocols, Network Devices, Cisco Packet Tracer, Fortinet
OS	Windows, Linux, MacOS, iOS, Android
Design	Photoshop, Sony Vegas, Spark AR, Figma
Office	LaTeX, Microsoft Office

Languages

Italian	Native
English	IELTS 6.5 (B2/C1)

Licenses

Driving Car	Italian Category B (EU)
Driving Motorcycle	Italian Category A2 (EU)

Work Experience

VLC2 — *Asti, Italy*

DevOps Consultant — *03/2026 - 07/2026*

- Managed AWS cloud infrastructure for major clients and codified it with Terraform for reproducible, consistent environments, containerising and orchestrating workloads with Docker and Kubernetes while administering Linux servers and clients, migrating both to newer releases and taking full ownership of a project repository's maintenance.

University of Turin Internal Research Internship — *Turin, Italy*

Data Analyst & AI Developer — *10/2024 - 08/2025*

- Designed and developed a custom supervised machine-learning model, applying statistical data analysis to detect and mitigate anomalies in business processes and to optimise the workflows behind them.

OpiCons S.R.L. — *Asti, Italy*

Specialized IT Consultant — *12/2022 - 08/2023*

- Looked after clients' hardware, software and network infrastructure and hardened it with Fortinet, maintaining close client relationships to keep each engagement running smoothly end to end.

CaredioGroup S.R.L. — *Montegrosso D'Asti, Italy*

Part -Time External IT Specialist — *01/2022 - 08/2023*

- Managed hardware and software across warehouse and office environments and designed, built and maintained the network connecting them, with a strong focus on cybersecurity and hardware security to protect day-to-day operations.

Dedalus Piemonte S.P.A. (Branch of Dedalus Italy) — *Asti, Italy*

IT Technician — *06/2021 - 12/2022*

- Kept critical hardware, software and network infrastructure running for real-time healthcare systems across Asti's two hospitals (Asti and Nizza Monferrato), the local health authority (ASL di Asti) and the community health houses and district health posts throughout the province, hardening public healthcare cybersecurity and mitigating critical bugs and security breaches to safeguard essential services.

Perrone Informatica — *Asti, Italy*

Social Media Manager — *04/2020 - 05/2021*

- Designed and built the company website and ran its social presence, editing video and photo content and shaping brand identity to strengthen the company's online reputation.
